

PV-Cam Viewer for P2P Cam

App Store/Play Store
Installation Quick Guide

GREEN LEAF

1. Install the App “PV Cam Viewer”

We provide 2 methods to install PV Cam Viewer app.

1. Scan the QR code on this page with the QR code reader on your smart phone. The app will be downloaded automatically.

2. To manually install PV Cam Viewer, go to App Store(iOS) or Play Store (Android) on your phone. Enter “PV Cam Viewer” to search and download the App “PV Cam Viewer”.

Once “PV Cam Viewer” icon shows on your phone, the app is successfully installed.

2. Configure Device Wi-Fi (P2P connection)

(1) In order to connect your device with your phone, turn on the Wi-Fi function on your device.

(2) Go to **Settings >> Wi-Fi** on your smart phone, and turn on Wi-Fi function.

(3) Enable the Wi-Fi to search for the name of Wi-Fi network which is displayed as ID on the device. (For example: the ID is P000048.)

(4) Join the network and enter the password "88888888".

(5) Return to the home screen and start the app "PV Cam Viewer".

When the information **Device on-line** appears on **Device Management**, it means the Device Wi-Fi (P2P connection) is successfully configured.

3. Synchronize the Time

It's important to sync the time on device and your phone before the first recording. Please go to **Program Setting** on main menu, tap on **Synchronize the time**, and enter the correct time.

4.Stream Live View

you can start to remotely control your camera and remotely stream live view.

(1)Go to **Device Management**, and tap on the device you want to operate.

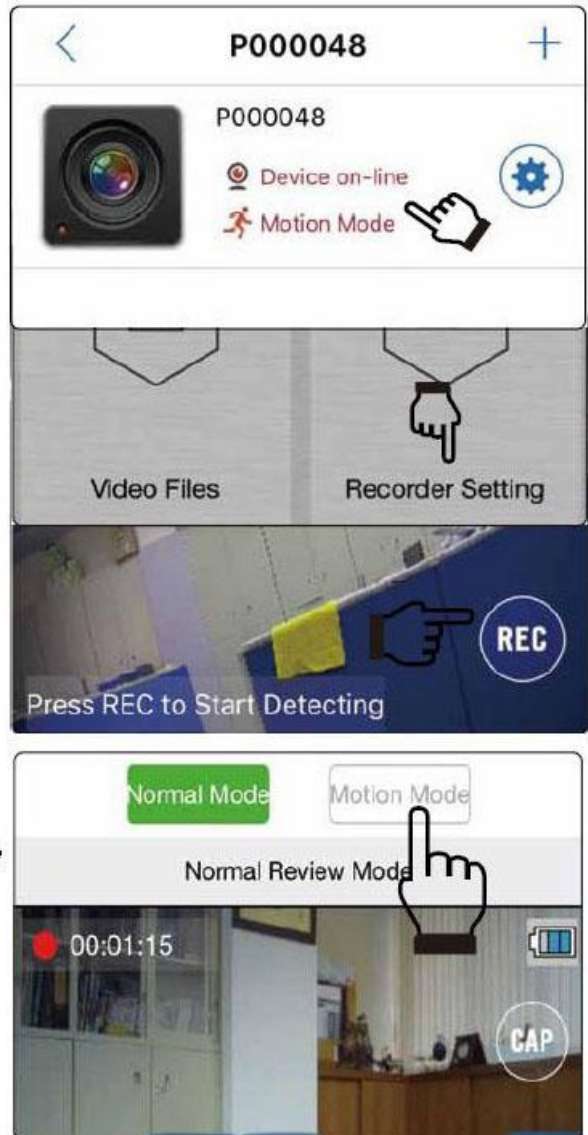

(2)Go to **Recorder Setting** on **Main Menu**. A live view will be displayed on screen.

Note: If you go to Program Setting, the ongoing recording will pause, and restart again when you exit it.

(3)Press **REC** to start recording. Press **STOP** to stop recording.

(4)To change the recording mode, please press **STOP** to pause the recording first, and then tap on the mode you want.

(5)To take a snap shot, please press **STOP** first, and tap on **CAP**. You could go to **Main Menu > Video Files > Photograph** to check your photos.

(6) To turn on the overwrite function, go to **Recorder Setting > SETUP** when there is no ongoing recording. Swipe right to turn on **Overwrite** function.

5. Download Videos and Photos

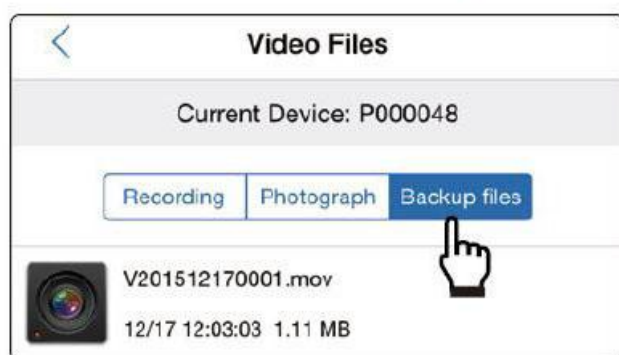

(1) To back up files to your phone, please go to **Recording** in **Video Files**, find the video file you want to back up and swipe it to the left. Then, select **Backup files**.

(2) Go to **Backup files** to check if the file is successfully backed up in your phone.

*Files in **Backup files** are stored in your phone.

*Files in **Recording** or **Photograph** are stored in the memory card.

6. Lock up the files

If you want to protect the files from being overwritten or deleted, go to **Video Files**, and tap on the grey lock icon  of the file you would like to lock up. When the icon turns blue,  the file is successfully locked up.
